Consistent carbon products manufactured to ISO 9002 certification.

Electro-Motive is pleased to announce the transfer of business for your company's locomotive carbon brush requirements to be direct through National Electrical Carbon Corporation, effective September 1, 1994.

While all carbon brush products will be purchased and shipped direct from Greenville, South Carolina, Electro-Motive will continue its partnership with National on end product application, aftermarket product endorsement, new product developments and testing. Electro-Motive and National are committed to helping you maintain high levels of product performance and superiority as well as continued service and training. This new approach in the marketplace is a concentrated effort to recognize the importance of earning and maintaining your business and to better serve your needs.

National Electrical Carbon Corporation (NECC) looks forward to becoming your direct supplier for your carbon brush requirements. Located in Greenville, South Carolina is our premier worldclass facility which is ISO 9002 certified. Also, our Continuous Improvement Process is well represented through the available and consistent performing materials engineered within all our various carbon brush grades.

NECC is ready to serve your needs!

EDI ready, on-time delivery, on-site training/brush and motor analysis, "In the Pits" technical personnel, ISO 9002 certified, EMD approved and dedicated customer service support.

*All transactions or inquiries can be forwarded to:
